

Rosengrens Document Cabinet

MultiDoc our new tested safe for protection

If you need fireproof storage for your documents, MultiDoc is the safe for you. Our new range consists of tested modular safes in various sizes - a safe for every specific need. No one safe is like another, so the final touches are up to you.

Safes and tested safes

Our new safes are tested and certified by SP to the NT Fire 017 standard. This guarantees that the documents stored in the safes will withstand fire for 60/120 minutes. With a safe that has not been tested or built with tested material, ash is probably all that would be left of your documents in the event of a fire. When buying fire protection, make sure it has been officially tested - it will save you money, and save your paperwork.

Ten sizes and flexible fittings

To help you get the most out of binder storage in the MultiDoc, we have designed a new extensible shelf. We call it the high-capacity shelf. You will not be able to store more binders in a safe in any other way. Since we also discovered a need for a support shelf, we designed that too. We have also improved our DIS-tested

datamedia insert with fittings such as flexible shelves, lockable compartments, etc. These new features, together with our wide range of interior fittings, gives you the flexibility to store your documents in the best possible way. You can even order new fittings once the safe has been delivered.

Innovations

Our new MultiDoc safe boasts several unique new features. One is the door. You will notice that closing the door of a MultiDoc safe is no different from closing the door to your car - instantly sealed with no play at all. Just slam the door to obtain full fire protection. Another innovation is a new perforation technology to improve fire safety even further.

Locks, locks and locks

We do not have a standard version of lock on MultiDoc safes. We can supply you with key locks, combination locks, electronic locks or a combination of locks. If you need to control and register all usage, use RCD - our electronic control system. All our models are prepared for dual locking, and come with high-quality tested locks.

Protection against fire

Design

Once again we have used a well-known designer, this time Pelle Pettersson, to create the styling of our safes. We have also devoted a lot of effort to making the safes ergonomic. A safe should work with the user and the surroundings, not against them.

Modern production

All our new safes are manufactured at our state-of-the-art high-quality plant in Sweden. The plant is certified in accordance with ISO 9000, which guarantees the very best quality not only on the first safe manufactured, but also on the 15,000th. Furthermore, our products are subject to external manufacturing control by the relevant certification bodies.

As we mentioned earlier “No one safe is like another...”. This means that we build your safe according to your specifications, i.e. tailor-made production.

The Environment

At the same time as investing in a new, modern plant, we also improved our environmental thinking. Our entire production, from the choice of material in the safes to the manufacturing process, is characterised by envi-

ronmental awareness. Most materials in the safes and the packaging are recyclable.

Multi Range

The MultiDoc is part of our Multi Range, which also includes MultiData and MultiSec. Our vision when we created the Multi Range was to make a safe that was as flexible and easy to use as possible. It used to be tricky to store documents, computer media and valuables, because you needed two or three different safes.

Our latest range of safes lets you store most of these things in one safe, saving time, money and space. You can even adapt the safe as your requirements change. Call it a living safe, if you like.

Rosengrens is Europe’s leading manufacturer of security solutions. It is our responsibility to inform you how to protect your most valuable assets against fire, break-ins and theft. It is our job to provide the tailor-made solutions. We have been doing it for over 150 years, so we know our business. Let us help you to help yourself. Consult us when it comes to security, because Rosengrens is more than safe.
